Contents Volume 95

Vol. 95. No. 1

Goal programming formulation in nutrient management for rice production in West Bengal
D. Ghosh, D.K. Sharma and D.M. Mattison 1

Economic design of two-stage $\bar{X}$ charts: The Markov chain approach
A.F.B. Costa and M.S. De Magalhães 9

A note on some prominent defective applications of neoclassical production theory
C. Daniel III 21

Improving trade-offs in manufacturing: Method and illustration
G.J.C. da Silveira 27

Nonparametric efficiency analysis under uncertainty using data envelopment analysis
J.K. Sengupta 39

Just-in-time component replenishment decisions for assemble-to-order manufacturing under capital constraint and stochastic demand
J.M. Betts and R.B. Johnston 51

Implementation of total productive maintenance: A case study
F.T.S. Chan, H.C.W. Lau, R.W.L. Ip, H.K. Chan and S. Kong 71

The impact of setup costs, commonality, and capacity on schedule stability: An exploratory study
M.J. Meixell 95

Using fixed and adaptive multivariate SPC charts for online SMD assembly monitoring
J.R. Villalobos, L. Muñoz and M.A. Gutierrez 109

Integrated production and product inspection policy for a deteriorating production system
C.-H. Wang 123

Letter to the editor
I. David 135

Diary of Events 137

doi:10.1016/S0925-5273(04)00382-2

Vol. 95. No. 2

A set covering formulation for agile capacity planning within supply chains
J.K. Cochran and A.M. Uribe 139

Key lessons from the implementation of an ERP at Pratt & Whitney Canada
A. Tchokogué, C. Bareil and C.R. Duguay 151

Virtual production line based WIP control for semiconductor manufacturing systems
R.G. Qiu 165

An optimal algorithm for solving the dynamic lot-sizing model with learning and forgetting in setups and production
H.N. Chiu and H.M. Chen 179

On lot streaming in multistage production systems
M.A. Hoque and S.K. Goyal 195

The optimal inventory policies under permissible delay in payments depending on the ordering quantity
K.-J. Chung, S.K. Goyal and Y.-F. Huang 203

A two-warehouse inventory model for items with stock-level-dependent demand rate
Y.-W. Zhou and S.-L. Yang 215

Optimal lot sizing for an unreliable production system under partial backlogging and at most two failures in a production cycle
B.C. Giri and W.Y. Yun 229

Component allocation and feeder arrangement for a dual-gantry multi-head surface mounting placement tool
D.-S. Sun, T.-E. Lee and K.-H. Kim 245

Managing learning resources for consecutive product generations
L.L. Demeester and M. Qi 265

Diary of Events 285

Vol. 95. No. 3

A periodic-review model with serially-correlated, inventory-level-dependent demand
T.L. Urban 287

Incorporating transport cost in the lot size and pricing decisions with downward sloping demand
P.L. Abad and V. Aggarwal 297

Predicting the output of a tube-bending process: A case study
S.K. Chen, P. Mangiameli and C.J. Roethlein 307

A mixed integer programming model for a two line CONWIP-based production and assembly system
D. Cao and M. Chen 317

An integrated operations–marketing model for innovative products and services
S. Ray 327

The impact of free goods on the performance of drum-buffer-rope scheduling systems
S.S. Chakravorty and J.B. Atwater 347

Optimal budget and cash flows during retrofitting periods in batch chemical process industries
M. Badell, J. Romero and L. Puigjaner 359

Inventory inaccuracy and supply chain performance: a simulation study of a retail supply chain
E. Fleisch and C. Tellkamp 373

Using relative profits as an alternative to activity-based costing
C. Homburg 387

Constraint-based schedule repair for product development projects with time-limited constraints
J. Wang 399

Multi-attribute comparison of advanced manufacturing systems using fuzzy vs. crisp axiomatic design approach
O. Kulak and C. Kahraman 415

Diary of Events 425
